

# Stadiums

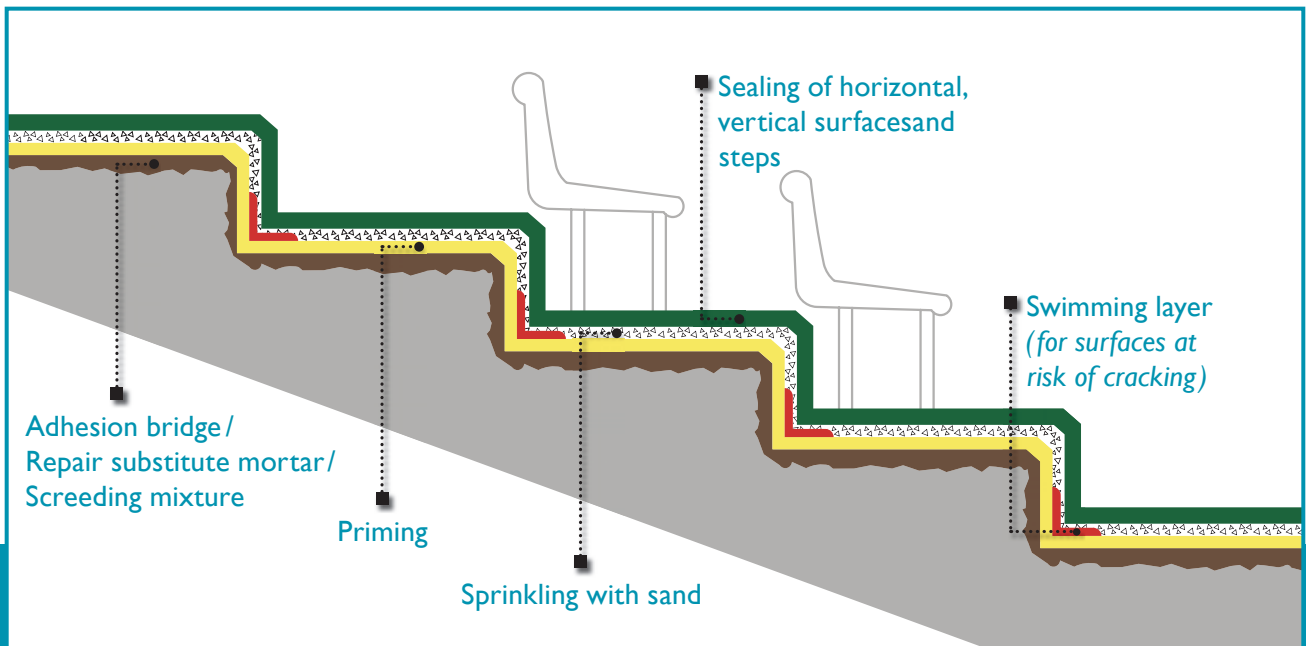

Protection and waterproofing/sealing  
of stadiums using ROMEX® Systems

37.500 m<sup>2</sup> of stadium grandstand restoration at the  
Zentral stadium NSK Olympic, Kiev / Ukraine

## Restoration of grandstands

Requirements for grandstands in stadiums are getting ever more strict. The owners of the stadiums, big international football organisations such as FIFA and UEFA as well as the spectators themselves, require ever more safety, comfort, longevity and visual attractiveness for the areas in which the spectators will be. New stadiums should thus be planned with these spectator needs in mind and old stadiums should be restored to the required standards.

Construction method - "Restoration of grandstands"

### Standard specifications for sales - "Restoration of grandstands"

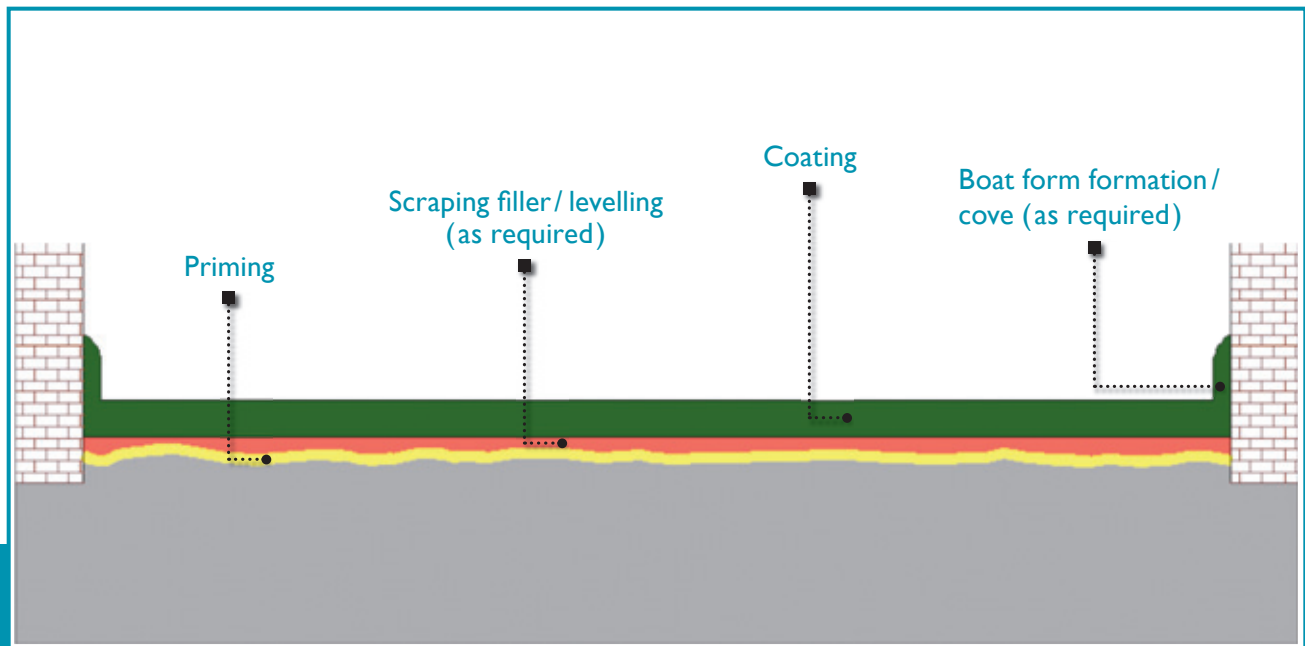

*Mechanically and chemically highly load bearing coating (short form)*

1. Prepare surface ready for application work
2. Preparation of concrete
3. a) Adhesion bridge using **ROMBOND® 5000**  
b) Repair substitute mortar using **ROMBOND® 5000**  
c) Screeding mixture using **ROMBOND® 5000**
4. Priming using **ROMPOX® 1505 Standard primer**
5. Sprinkling with sand
6. Swimming layer (for surfaces at risk of cracking) **ROMPOX® 1082 Elastified coating**
7. Sealing of horizontal, vertical surfaces and steps **ROMPOX® 1080 Elastic coating**
8. As required - metallic joints
  - a) Corrosion protection for metallic joints
  - b) Coating of prepared steel surfaces of metallic joints

**Detailed standard specifications for sales for new construction and restoration can be supplied on request.**

# Floor coatings

As well as the spectator grandstands, there are numerous other public and non-public areas for which the correct floor coating is very important. This includes changing rooms, treatment rooms, restaurant areas and spectator walkways. The type of floor construction for these areas ranges from smooth to completely nonslip (R13) as well as according to requirements - boat shaped floors (cove).

Construction method - "Floor coating"

## Standard specifications for sales - "Floor coating"

*Highly abrasion resistant (short form)*

1. Preparation of concrete
2. Priming  
**ROMPOX® 1505 Standard primer**
3. Scraping filler / levelling (as required)  
**ROMPOX® 1505 Standard primer, quartz sand**
4. Boat form formation / cove (as required)  
**ROMPOX® 1505 Standard primer, quartz sand**
5. Coating  
**ROMPOX® 1005 Coating**

**Detailed standard specifications for sales for new construction and restoration can be supplied on request.**

ROMEX® supplies proven systems especially for new construction and restoration of stadiums, in order to meet all requirements:

- |                         |                         |
|-------------------------|-------------------------|
| • Protection            | • Longevity             |
| • Waterproofing/sealing | • Comfort               |
| • Safety                | • Visual attractiveness |

## ROMEX® Worldwide trademark for our customers

For decades now, ROMEX® has had a strong influence on the development of PU and EP coatings. We have many years of experience in the area of "Protection and sealing of stadiums" and are available as a competent partner for new construction and restoration of stadiums.

By working with our local representatives and the ROMEX® trained partners, we can guarantee the necessary safety and problem free conclusion of projects for our customers.
